

Client-nominated award highlights EPG's commitment to driving exceptional supply chain performance and innovation

EPG Named a 2026 Great Supply Chain Partner by SupplyChainBrain

Ehrhardt Partner Group (EPG), a global leader in unified supply chain execution and warehouse management technology, announced today that it has been named to SupplyChainBrain's prestigious list of 100 Great Supply Chain Partners of 2026. This recognition is driven entirely by nominations from customers who credit EPG's innovative supply chain technology, dedicated team, and collaborative partnership for delivering significant value to their businesses.

Each year, SupplyChainBrain's list is compiled from thousands of submissions by supply chain professionals who share real-world examples of how solution providers have made a significant difference in their operations. EPG's inclusion in the 2026 list underscores its commitment to delivering proven results across complex supply chain environments. "For twenty-four consecutive years, SupplyChainBrain has published our much-anticipated list of 100 Great Supply Chain Partners — a select group of companies whose customers recognize them for providing outstanding solutions and services," says Brad Berger, Publisher of SupplyChainBrain. "Our six-month online poll of supply chain professionals requires a qualified response, asking them to nominate vendors and service providers whose solutions have made a significant impact on their company's efficiency, customer service and overall supply chain performance. This year's field of nominees was highly competitive and overall excellent — coming from all areas of supply chain management. Your company should be proud to be named as one of the 100 Great!"

Customers nominated EPG for this recognition because of the measurable value the [EPG ONE™ unified supply chain execution suite](#) delivers across increasingly complex supply chains. Combined with the [AI-native EPG AURA environment](#), EPG helps organizations unify warehouse execution, automation, workforce optimization, transportation, and real-time operational intelligence within a single platform. The result is greater

productivity, end-to-end visibility, and faster, more informed decision-making across the supply chain.

"This recognition reflects the strength of the partnerships we've built with our customers," says Jett Chitanand, President of EPG Americas. "Supply chains continue to evolve rapidly, and organizations need technology that connects execution, automation, and intelligence across their operations. We're honored that our customers recognize EPG as a trusted partner in helping them improve performance, embrace AI, and build more resilient supply chains."

EPG will appear in the 2026 August issue of SupplyChainBrain magazine and on SupplyChainBrain.com as a celebrated member of this year's 100 Great Supply Chain Partners.

Learn more about [EPG ONE](#) unified supply chain execution platform and AI-native [EPG AURA](#) environment, enabling smarter, more connected logistics for organizations worldwide.

EPG – Ehrhardt Partner Group

EPG is a leading international provider of a comprehensive Supply Chain Execution Suite (EPG ONE) and employs more than 1,000 people across 23 locations worldwide. More than 1,600 customers use EPG solutions to optimize their logistics operations in manual, semi-automated, and highly automated environments, including airport ground handling and cargo operations. The portfolio includes a Warehouse Management System (WMS), Warehouse Control System (WCS), Workforce Management (WFM), Transportation Management System (TMS), multi-carrier shipping software, voice-directed workflows (LYDIA Voice), and specialized software solutions for the aviation industry.

Complementing the EPG ONE Suite, EPG AURA provides an AI-native environment featuring modular AI services and functionalities, including AURA Agents and Capabilities, designed to intelligently enhance operational supply chain execution. AURA can be deployed alongside the

EPG ONE Suite or operate independently with third-party systems such as ERP platforms, warehouse software, automation solutions, and other enterprise applications. AURA connects and synchronizes data, events, and processes across warehousing, transportation, and production environments, supporting and orchestrating logistics operations in real time. Based on this foundation, decisions can be prepared, supported, or executed fully autonomously. Consulting services, cloud and managed services, and the EPG Academy further expand the portfolio with comprehensive offerings for the planning, operation, and continuous optimization of modern logistics environments.

SupplyChainBrain

[SupplyChainBrain](#), today's most comprehensive supply chain management information resource, is accessed year-round through a wide range of ever evolving multi-media formats by hundreds of thousands of the world's most influential supply chain executives. In addition to addressing the fundamental principles of supply-chain management, SupplyChainBrain identifies the latest news, emerging trends, technologies, and best practices, forward thinking ideas and cutting-edge solutions - and continues to write and report about these as they evolve and mature.
