

LydiaTM
VOICE

THE #1 VOICE PICKING SOLUTION

BOOST WAREHOUSE PRODUCTIVITY WITH LYDIA VOICE.

YOU'VE SEEN WHAT VOICE CAN DO. **NOW SEE WHAT IT SHOULD DO.**

If you're already using voice technology in your warehouse, you know the benefits: faster picks, fewer errors, smoother workflows. The technology works. But what if it could work even better?

LYDIA Voice takes everything voice systems promise and pushes it further. With smarter AI-based recognition, zero training, and unmatched flexibility, your team gets more

done in less time – with less effort. Just intelligent voice performance that adapts to your people, not the other way around.

TEST LYDIA VOICE side by side with your current system. Real data, real results, zero risk. Most companies don't look back.

LYDIA VOICE VS. OTHER VOICE SOLUTIONS:

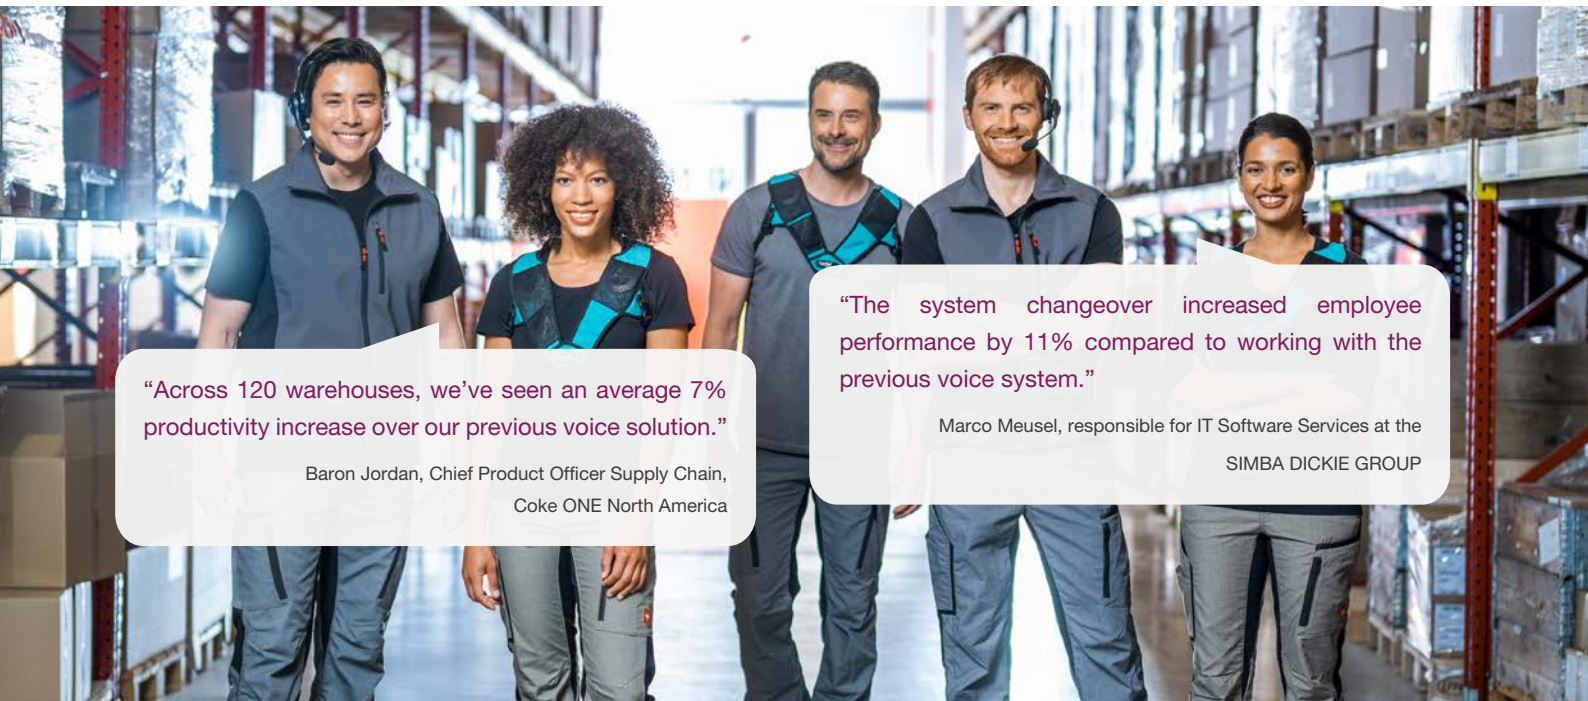

**80% REDUCTION
IN ONBOARDING TIMES**

**7-15% MORE
PRODUCTIVITY**

**30% LOWER TOTAL
COST OF OWNERSHIP**

"Across 120 warehouses, we've seen an average 7% productivity increase over our previous voice solution."

Baron Jordan, Chief Product Officer Supply Chain,
Coke ONE North America

"The system changeover increased employee performance by 11% compared to working with the previous voice system."

Marco Meusel, responsible for IT Software Services at the
SIMBA DICKIE GROUP

YOUR VOICE SYSTEM IS ONLY AS GOOD AS WHAT IT UNDERSTANDS.

Voice technology changed the game for warehouse operations. Most systems were good... for their time. Nowadays, many lack improved setup time, user training, and recognition accuracy. LYDIA Voice is redefining what

voice should do – starting with recognition. Powered by over 25 years of system development and advanced AI voice recognition, LYDIA Voice's technology is the best on the market. Period. Here's why:

100% GDPR
COMPLIANT

NO VOICE TEMPLATE TRAINING:

Unlike other voice solutions, LYDIA Voice does not require any voice template training, shortening onboarding times by up to 80% and creating a dynamic workforce for seasonal surges, unexpected sick days, and tight timelines.

SUPERIOR VOICE RECOGNITION:

Deep neural network technology supports the recognition of strong accents and dialects, even in loud industrial environments. This makes LYDIA Voice the most precise system on the market, especially for multilingual teams.

PARALLEL MULTILANGUAGE RECOGNITION:

LYDIA Voice is the only voice picking solution that can speak and understand multiple languages simultaneously, empowering employees from any background to execute effectively. The output language can also be switched easily via voice-command.

70+ LANGUAGES:

LYDIA Voice is equipped with a preloaded portfolio of 70+ languages and has the capability to add any other on request. Source talent easily and streamline communication.

“Even if pickers speak with a strong dialect or accent, the system understands their commands every time. That’s an important aspect for us as we employ staff from 20 different countries.”

Stefan Hahn, Head of the Supply Chain Management at REWE

WHEN SOFTWARE AND HARDWARE SPEAK THE SAME LANGUAGE.

Peak performance in the warehouse doesn't happen by accident, it happens when software and hardware are perfectly aligned.

VOXTER™ Vantage VT5: Designed for Voice, Engineered for Performance

LYDIA Voice and VOXTER Vantage VT5 are built to work in perfect sync combining smart software with purpose-built hardware. The latest generation of LYDIA's voice-optimized mobile computer boasts 3x faster voice recognition. Lightweight comfort, flawless WiFi performance, and extended configuration options equip users for all-day efficiency and swift precision. The VOXTER Vantage VT5 isn't just fast, it's built to last. Designed with full voice control and zero mechanical buttons, it eliminates common failure points.

Android Industrial+ Operating System

The VOXTER Vantage VT5 runs with Android Industrial+, a secure, voice-optimized operating system developed for industrial environments. It offers maximum data privacy, long-term stability, and seamless performance with LYDIA Voice.

Hardware Independence: We Believe in Flexibility

LYDIA Voice is the #1 voice system on Android. Combine LYDIA Voice software with its native hardware or use compatible third-party devices that meet the same high standards. To ensure full functionality, third-party hardware must be voice-capable and equipped with an Android operating system.

FIND YOUR AUDIO-FIT

LYDIA Voice offers a medley of optimized audio solutions. From rugged headsets to LYDIA Voice's unique VoiceWear Air vest, outfit your employees with the latest user-friendly tech for prime picking performance.

Voice Picking Without a Headset:

LYDIA VoiceWear Air integrates an advanced audio array of microphones and speakers directly into the world's first

Bluetooth-enabled picking vest. No external cables or headphones – just unrestricted freedom of movement that sets new standards for ergonomics, safety and efficiency.

"The hardware spoke for itself. It was way more innovative than what we saw from the competition."

Mette Margarethe Poulsen,
NORMAL

DON'T SETTLE FOR OUTDATED TECHNOLOGY—**GIVE YOUR TEAM THE TOOLS THEY NEED TO CRUSH THE COMPETITION.**

AI-POWERED LYDIA VOICE LIVE TRANSLATION

Eliminate language barriers with instant, real-time translation outside of the picking process. Associates communicate naturally in their native language, boosting confidence, comfort, and productivity. Companies unlock global talent, improve retention, and simplify workflows – breaking barriers and building stronger teams.

The solution utilizes existing LYDIA Voice hardware and infrastructure. The AI-powered speech recognition takes place 100% locally on the device, ensuring gamechanging performance.

1 TO 1 COMMUNICATION

- Translation of real-time conversations
- Each user can communicate in their preferred language

BROADCAST MESSAGING

- Text message to multiple users
- Audio output in the user's preferred language

WORK. PLAY. WIN.

TURN ROUTINE TASKS INTO MISSIONS AND EMPLOYEES INTO TRUE TEAM PLAYERS

Imagine your warehouse running like an exciting multiplayer game: every point counts, every level brings new motivation – and the whole team is playing to win. LYDIA Voice integrates scientifically based gamification methods into everyday logistics in a practical way.

Rankings make successes visible, team challenges spark ambition, and common goals bring people together. Routine tasks become missions, and employees become real teammates. More energy, more cooperation, more performance – welcome to game mode for LYDIA Voice.

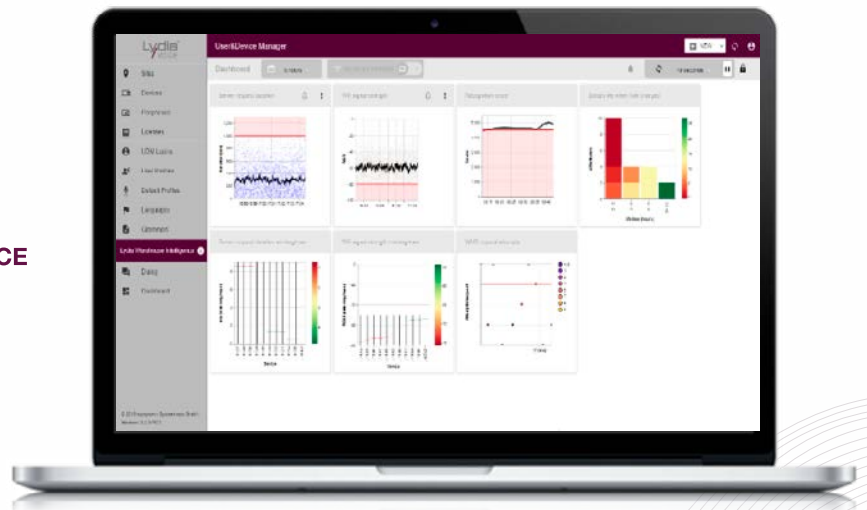

LYDIA WAREHOUSE INTELLIGENCE – THE SMART VOICE ANALYTICS TOOL

Keep floors running at full speed. LYDIA Warehouse Intelligence transforms operational voice data into clear, actionable insights to support smarter decisions and boost efficiency. Users can monitor KPIs based on process,

user, and device data to visualize system performance, detect irregularities, and uncover opportunities to optimize processes. Early visibility into system and device data enables faster decisions and predictive maintenance.

KEY METRICS:

- ✓ **WORKER INTERACTION TIMELINE**
- ✓ **VOICE RECOGNITION PERFORMANCE**
- ✓ **SITE WI-FI COVERAGE**
- ✓ **BATTERY HEALTH**
- ✓ **LATENCY**

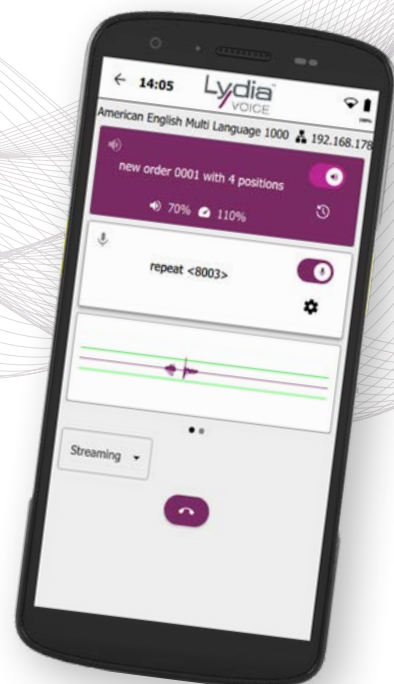

LYDIA VOICE COPILOT – SMARTER ONBOARDING & SUPPORT

LYDIA CoPilot is a powerful support tool that accelerates onboarding and simplifies first-level support. In Support Mode, supervisors gain a live view of active voice sessions and can analyze spoken inputs, system responses, and environmental conditions in real time. This allows them to quickly identify the cause of issues and support voice users directly on the warehouse floor. Problems can be resolved immediately – without interrupting the workflow or leaving the workstation.

KEY BENEFITS:

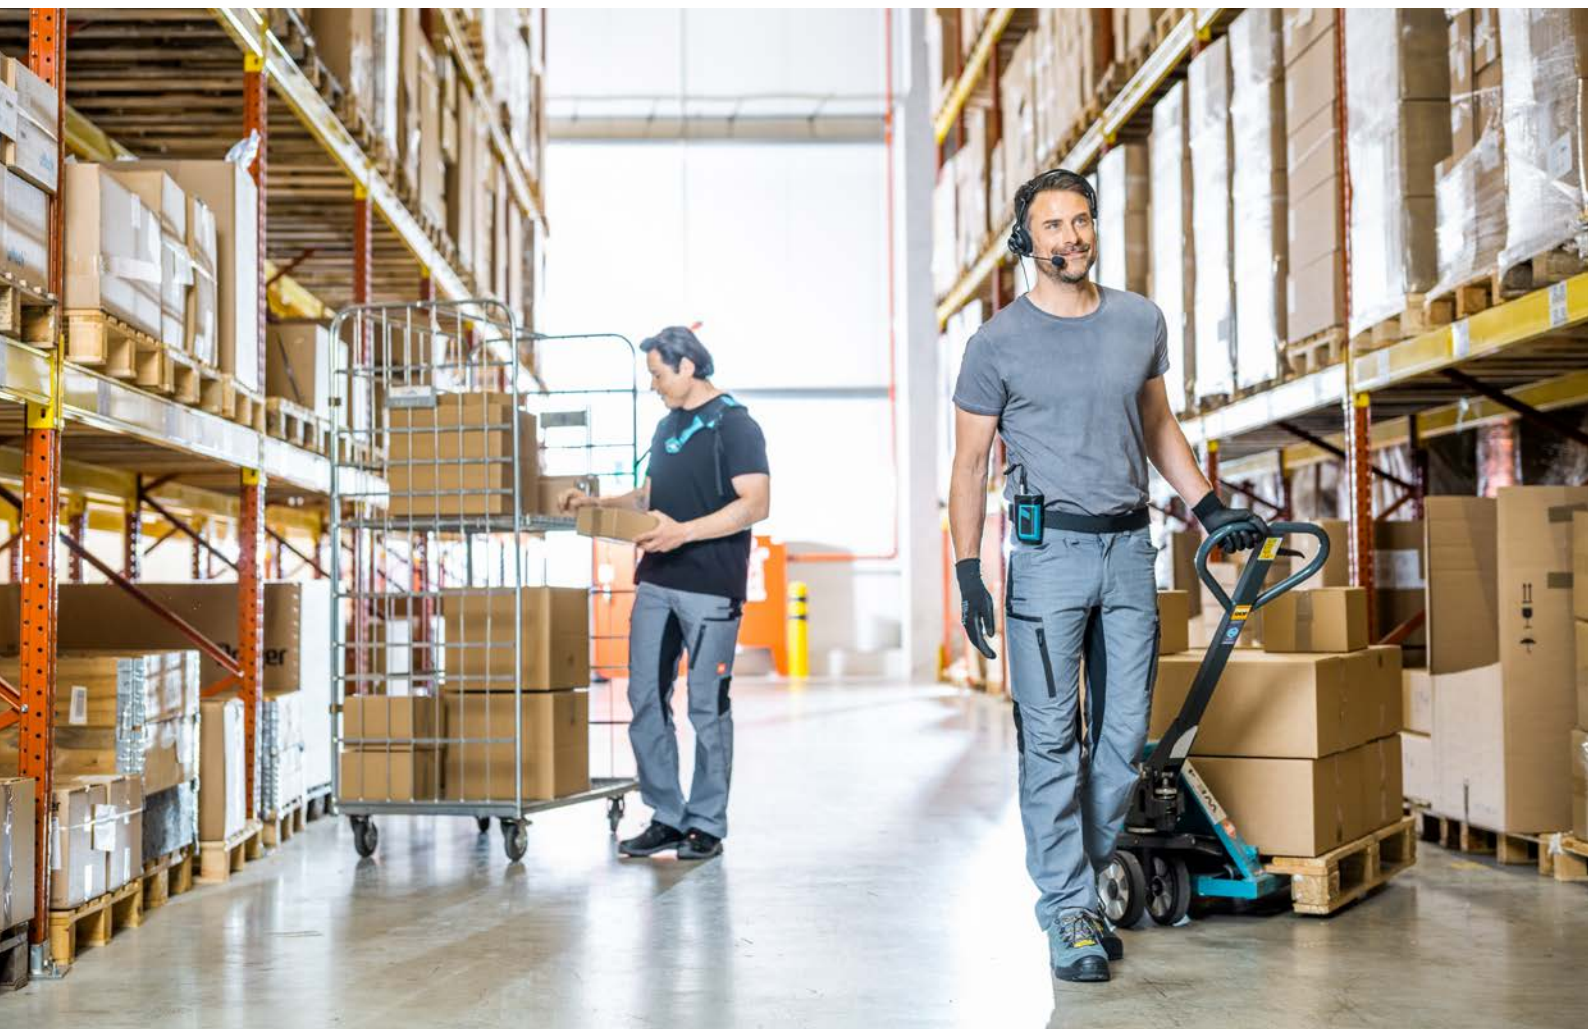

- ✓ **MONITOR AND SUPPORT REAL-TIME DIALOGUES**
- ✓ **ANALYZE RECOGNITION QUALITY**
- ✓ **INTEGRATED VOIP COMMUNICATION**

LYDIA VOICE OFFERS MORE INTEGRATION OPTIONS THAN ANY OTHER VOICE SYSTEM

Reap results from day one without reworking your infrastructure. LYDIA Voice seamlessly integrates with **ANY** WMS or ERP system, whether standard or custom-built. Thanks to flexible interfaces and proven connectivity modules, there's no need for costly middleware or deep system changes. The result: fast implementation, minimal IT effort, and a voice solution that fits your environment – not the other way around.

LYDIA Voice pairs with everyone, but as a certified SAP partner for nearly 20 years, the system offers fully native integration based on SAP standards, ensuring complete compliance with SAP application logic.

FLEXIBLE LICENSING MODELS - DESIGNED TO FIT YOUR OPERATIONS AND FINANCIAL STRATEGY

LYDIA Voice offers a flexible licensing approach that aligns with real-world warehouse operations. Instead of tying costs to the total number of employees, the base software is licensed based on the number of users working at the same time. This allows companies to scale efficiently, especially in multi-shift environments with fluctuating workforce sizes.

With both perpetual and subscription options, businesses can choose the model that best fits their financial strategy – whether prioritizing long-term investment or operational flexibility. Combined with optional add-ons and cloud hosting, LYDIA Voice ensures a transparent, scalable, and future-proof licensing structure.

LYDIA VOICE BASE LICENSE: (PER CONCURRENT USERS):

- ✓ PERPETUAL OR SUBSCRIPTION
- ✓ ALL AVAILABLE LANGUAGES INCLUDED
- ✓ EASY LICENSE TRANSFER BETWEEN DEVICES

OPTIONAL MODULES & HOSTING: (SUBSCRIPTION)

- ✓ LYDIA CLOUD HOSTING
- ✓ LYDIA WAREHOUSE INTELLIGENCE
- ✓ LYDIA LIVE TRANSLATION
- ✓ LYDIA GAMIFICATION

LYDIA VOICE CO-EXIST PROGRAM

TEST WITHOUT RISK. SWITCH WITH CONFIDENCE

LYDIA Voice makes the smart switch easy with its innovative Co-Exist Program. Test LYDIA Voice risk-free alongside your current system and compare performance, accuracy and user feedback.

“From the moment we gave LYDIA Voice to the team, we saw major productivity increases in every facility, every person, every shift. Our users to this day love it!”

Thomas Peterson, Senior Solution Architect,
Coca-Cola Southwest Beverage

No changes to your WMS or ERP are needed. No system downtime. Just a fast, flexible way to prove how LYDIA Voice outperforms legacy solutions – without interrupting your daily operations.

“LYDIA Voice was already easy and intuitive to use during the test – you’re ready to go straight away.”

Renato Häfliger,
Managing Director Sapore Fresco AG

EASY INTEGRATION:

LYDIA Voice integrates seamlessly with any WMS/ERP, outfitting your existing infrastructure with smarter tools.

BIG PRODUCTIVITY GAINS:

Companies that switch from legacy voice solutions to LYDIA Voice report productivity increases of 7% to 15%.

PROVEN RESULTS:

100% of customers who have participated in the LYDIA Co-Exist Program have chosen to adopt LYDIA Voice permanently.

DOWNLOAD THE LYDIA VOICE DEMO TODAY.
